RubberForm Patio Blocks are the safe, durable and long-lasting alternative to concrete or stone paving blocks. Ideal for large, high-traffic areas, root free zones, path and work areas to and around roof top mechanicals. Our patio blocks are made of 100% heavy-duty recycled rubber, providing excellent resistance to severe wind/weather, as well as damaging UV rays. Traction is superb, even when wet. The soft, pliable material makes them an anti-fatigue surface with excellent impact and sound absorption qualities. They are also safer for the young and old - with no hard surfaces to fall on.

- Flexible: conforms to ground curvature.
- Environmentally-friendly: made in the USA from durable recycled rubber tires.
- All-weather easy maintenance: will not warp, chip, crack, crumble or corrode.
- Resistant to extreme temperature variations, UV light and moisture.
- Temporary or permanent installation.
- Easy to install, easy to move by one person.
- Economical
- Can be cut to shape or irregular forms
- Available in Black, Burgundy, Black / Burgundy Mix and Grey
